

Citrix Receiver Install Instructions

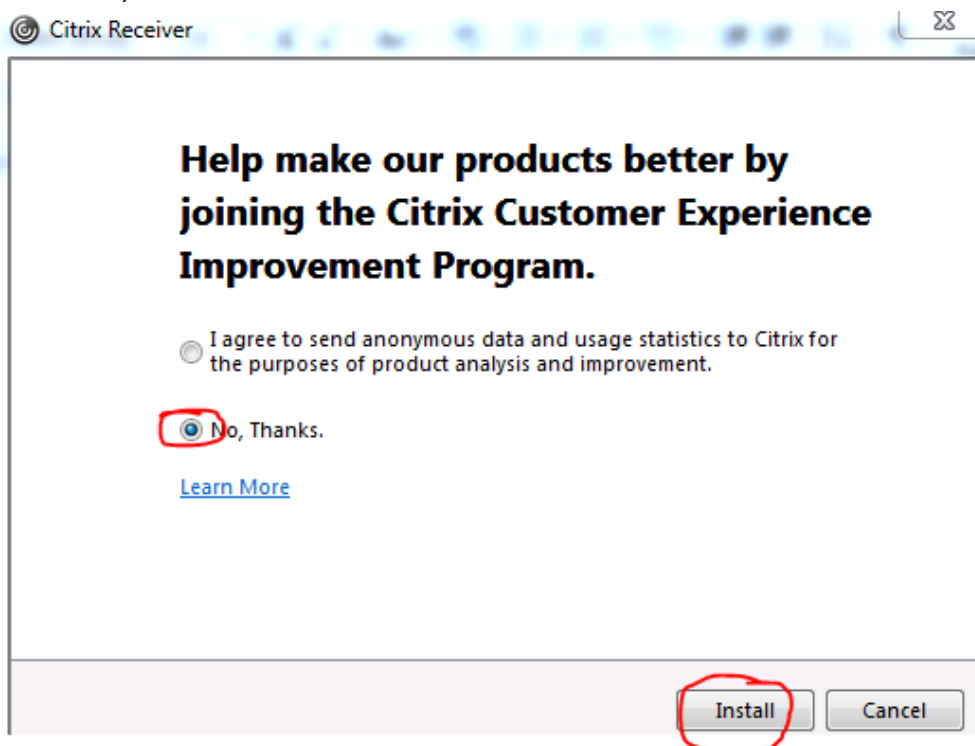

1. Download and run the Citrix Receiver install file.
2. When prompted click on the Start button.

3. Check the box that reads "I accept the license agreement" and then click on the Next button.

4. Check "No, thanks" and then click on the Install button.

5. Citrix Receiver will install. This may take several minutes.
6. That is the end of the install. However, Receiver *might* open and ask you to add an account by entering your work email or server address. Cancel out of that window and ignore it.

If you have problems installing the Citrix Receiver please download and run the Citrix Receiver Cleanup Utility and try the Citrix Receiver Install again.
