

## Entrust Remote Access Installation and Connection on a Mac

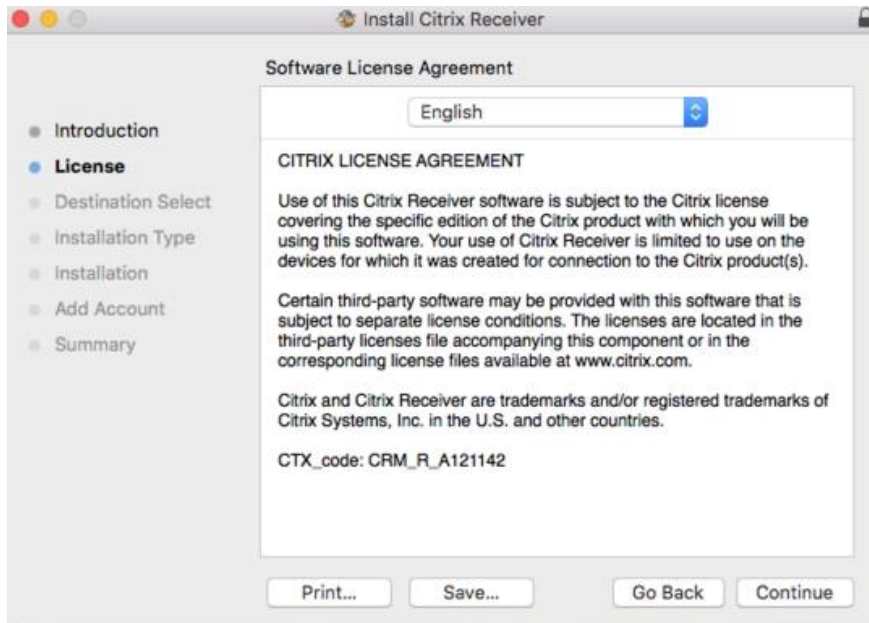

1. After downloading the installation file open CitrixReceiverWeb.dmg. This file is located in downloads folder in Finder.

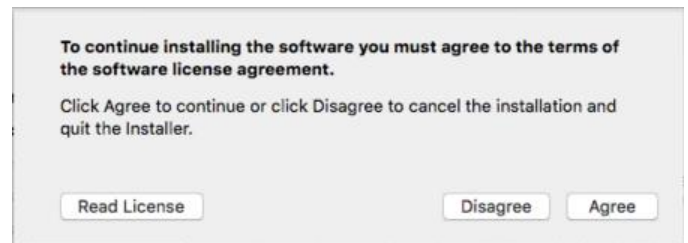

2. When Prompted click continue button to run the program installation and Introduction.

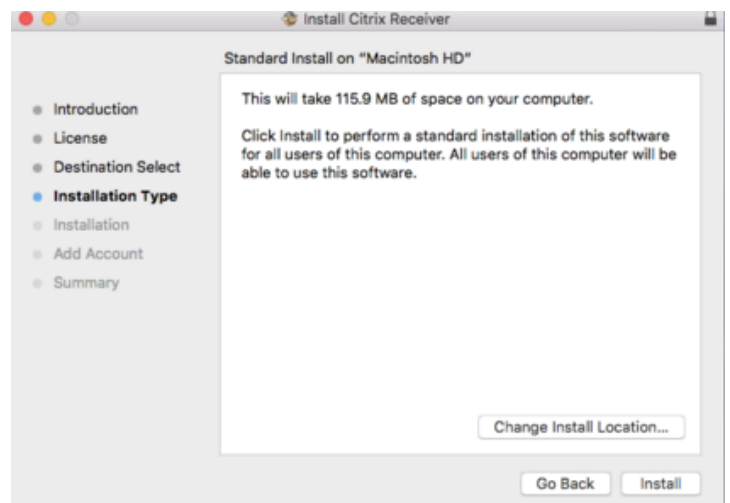

3. Click continue through the License Agreement

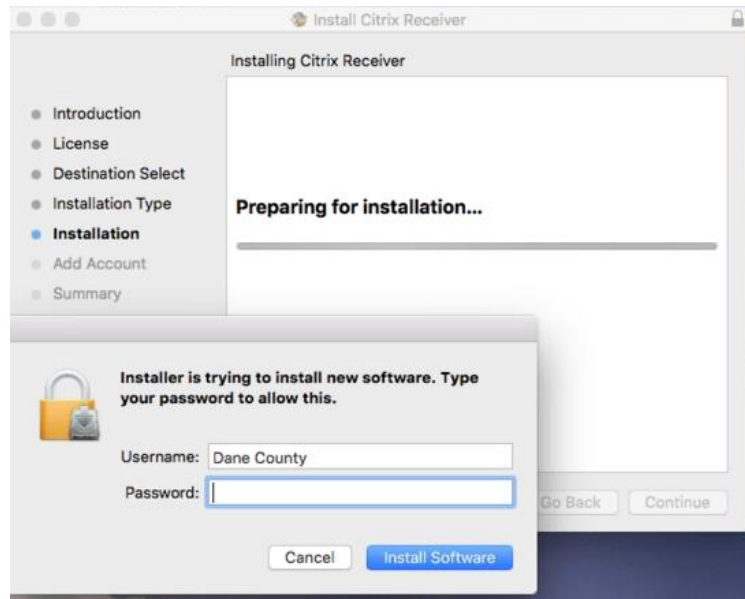

4. Click agree for the terms of the software.  
Note: When you click agree it will jump to Installation Type

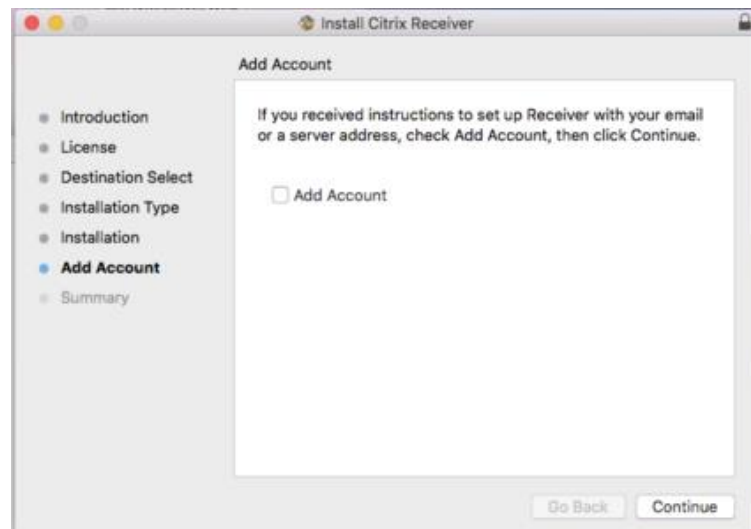

5. Do not change the install location, just select install.

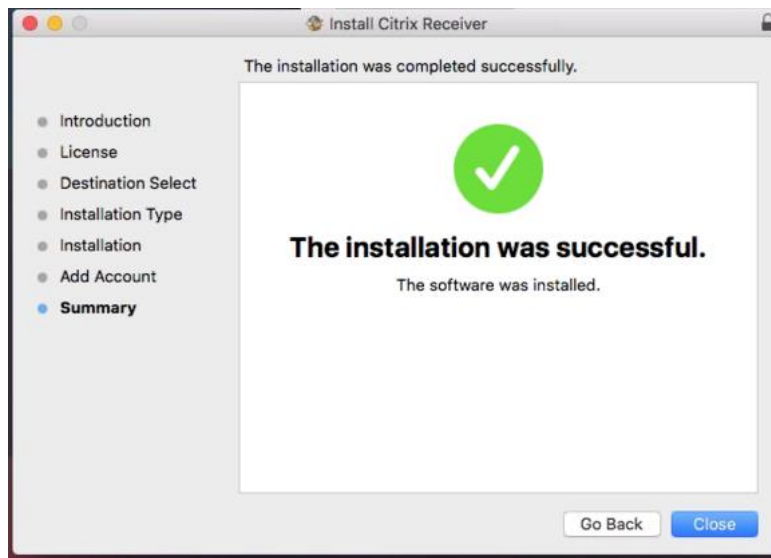

6. During the installation you will be prompted for a local user account password once entered select Install software.

7. Click continue in lower right of the screen. Do not check the box for add account

8. You will receive a Summary page notifying install was successful. Select close.

If you have problems installing Citrix Receiver please run the installer again and try uninstalling the software first
